

# Getting Started with ClearLight Lab Services

Clearlight provides tissue processing, imaging and analysis services to academic, biotechnology, and pharmaceutical researchers. Preclinical researchers who work with us gain a better understanding of the tissue and tumor microenvironment.

CLARITY is the foundation of Clearlight's lab services.

## What to Expect 6 Easy Steps

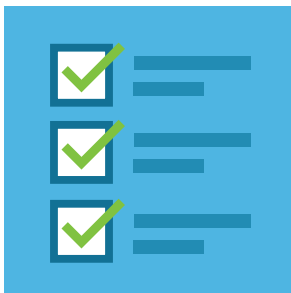

### 1: Contact Us

Contact us about your research question or goals. Complete our initial questionnaire.

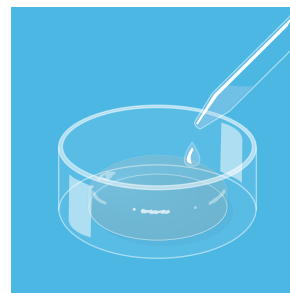

### 4: Send Samples

Establish a payment method and ship your samples according to our Sample Submission Guidelines.

### 2: Discuss

We'll set up a meeting to discuss your project, answer questions, and align the project goals.

### 5: Lab Services

Your samples are delivered and our Lab Services team gets to work. The TAT is typically 4 - 8 weeks.

### 3: Statement of Work

After the discussion we create a Statement of Work for your pilot project.

### 6: Results

You receive your Summary Report and data and we schedule a follow-up discussion to review the results and next steps.
